

ELECTRONIC WARFARE

Armada Analysis: A Monthly Defence Specialists eNewsletter

ARMADA INTERNATIONAL

We are delighted to introduce **Armada Analysis**' monthly **Electronic Warfare newsletter**.

We live in challenging and unpredictable times. Nowhere is this more apparent than in the electromagnetic spectrum.

The emergence of so-called 'hybrid warfare' in Europe and the Middle East, to the use of cyber warfare to manipulate elections and spread 'fake news' shows spectrum is now an operational domain in its own right.

The newsletter will take you behind the headlines with Armada's peerless analysis and insight, explaining often complex issues in a clear and concise way helping you separate the signal from the noise.

Armada International

AIR

MACS Factor: Bird Aerosystems will install its MACS (Missile Approach Confirmation Sensor) on United Nations' Mil Mi-8MTV1 medium-lift utility helicopters.

[Read more](#)

AIR

Mitigating the Missiles: UH-60 (US DOD) – The US Army is investing in enhanced protection for its UH-60 series medium-lift utility helicopters via the LIMWS and ATDS initiatives.

[Read more](#)

Building on a strong history of creating and integrating advanced solutions for the warfighter, **Raytheon's NGJ-MB** effort will produce the most reliable, dependable and affordable system to deny, degrade and disrupt threats while protecting U.S. and coalition forces.

INTERVIEW

The Hardware Store: BAE Systems has received funding from DARPA to advance its CHIMERA machine-learning hardware offering potential benefits to electronic warfare practitioners.
